SUMMARY

Detail-oriented **Frontend Developer** with hands-on experience in **Next.js, Tailwind CSS, and TypeScript**, specializing in building scalable, high-performance web applications. Proficient in crafting responsive, accessible, and user-friendly interfaces with a strong focus on modern UI/UX best practices.

Additionally, skilled in **MongoDB, Node.js, and Express**, enabling seamless backend integrations and full-stack development capabilities. Passionate about optimizing performance, maintaining clean code architecture, and staying updated with industry trends.

Seeking opportunities to contribute technical expertise to innovative projects while enhancing user experiences and driving business success.

EXPERIENCE

Fullstack Developer

Virograf

Dec '23 — Present
Ogun State, Nigeria

Built and maintained full-stack features for a startup matchmaking platform, delivering responsive UIs with Next.js and Tailwind CSS, and secure backend services with Node.js. Led key parts of the matchmaking logic, implemented JWT-based auth, and integrated Firebase for user data. Worked closely with design and product to streamline onboarding and profile workflows.

- **Responsive & Adaptive Design:** Developed fully responsive interfaces, delivering exceptional user experiences across all devices and screen sizes, achieving **98%** device compatibility.
- **Performance & Accessibility Focused:** Led debugging and optimization efforts across client and server environments, significantly improving page load times and reducing submission errors by **40%**, while ensuring strong adherence to accessibility standards for a broader audience.
- **Optimized User Journeys:** Meticulously crafted multi-step onboarding flows, significantly enhancing user progression and boosting completion rates by **15%**.

Frontend Engineer

Archibuzz

Oct '24 — Apr '25
Ogun State, Nigeria

Contributed to the development of a collaborative platform for architecture students by building responsive UI components for project feeds, course modules, and user profiles. Worked with product and design teams to translate user needs into clean, accessible interfaces, improving usability across devices. Strengthened skills in modern frontend development, version control, and cross-functional collaboration.

- **Impactful UI:** Engineered responsive, user-focused UI components (React, Tailwind CSS), increasing user engagement by **35%** and reducing onboarding drop-off by **25%**.
- **Technical Leadership & Optimization:** Collaborated with engineering to boost performance by **30%**, eliminate redundant code via reusable components, and enforce component-based best practices for scalable development.

SKILLS

Languages HTML, CSS, JavaScript, SASS, TypeScript

Technologies & Frameworks React.js, Next.js, Tailwind, Node.js, MongoDB, Express.js, Redux, Github

PROJECTS

CBT platform (Desktop App), Inventors Community [Link](#)

Present
Ogun State

- Built a Dynamic Fullstack CBT platform with Nextjs and Firebase that allows users log in, take tests and get their results seamlessly
- Ensured state management for current question selection, enabling real-time UI updates without page reloads.
- Learned how to use email services to send candidates results to their email or any email of their choice

EDUCATION

Bachelor of Technology in Computer Science, The bells university of technology

Present
Ota, Nigeria
